David Gustavo Merinos Sosa

Backend Engineer at GBM

Ciudad de México, México

Extracto

I'm a software developer with 6 years of experience, having worked at Verifone Inc. and GBM (Grupo Bursátil Mexicano). My expertise spans multiple programming languages, including C++, C#, Python, .NET, and Node.js, with a strong focus on cloud development and scalable architectures.

I hold a Master's degree in Computer Science from CINVESTAV, equipping me with a solid foundation in algorithms, system design, and advanced computing concepts.

As an AWS-certified Solutions Architect, Serverless Developer, AI Practitioner, and Cloud Practitioner, I specialize in designing and implementing cloud-native solutions. I thrive in challenging remote roles where I can apply my skills to cutting-edge technologies.

Based in Mexico, I'm actively seeking remote roles that challenge me and allow me to work on cutting-edge technologies. If you're looking for a developer with deep technical expertise and a cloud-first mindset, let's connect!

Experiencia

GBM

Desarrollador de back-end

mayo de 2022 - Present (2 años 11 meses)

México

- Cloud services architecture design using AWS.
- CI/CD of services using AWS Pipelines.
- Development of serverless systems in TypeScript, Python and C#; Dynamo and RDS.

Verifone

Desarrollador de software sénior

septiembre de 2019 - abril de 2022 (2 años 8 meses)

Ciudad de México y alrededores, México

Worked closely with SHCP (SAT) on the 'Factura Instantanea' project, this involved RESTful API and OpenSSL for security.

Worked closely with Inbursa on CODI project, this involved RESTful APIs as well.

Developed a Web API to communicate with Verifone Pinpads using Java and Python.

Daily activities consists on implementing new functionalities for already existing applications for different clients such as Santander, Banregio, EvOPayments, MIT.

Most projects use C++ language.

All projects are under SCRUM methodology.

Experience with GIT.

Centro de Investigación y de Estudios Avanzados del IPN

Estudiante

agosto de 2017 - agosto de 2019 (2 años 1 mes)

Ciudad de México y alrededores, México

Thesis project on the research area of Computational, discrete and combinatorial geometry.

Servicios Integracion y Apertura

Programador Analista

enero de 2016 - julio de 2017 (1 año 7 meses)

Villahermosa, Tabasco, México

Worked as part of development team on the implementation of ERP software.

Servicio Computadoras del Sureste S.A. de C.V.

Ayudante

enero de 2010 - enero de 2012 (2 años 1 mes)

Apple official support.
